Ferry Crossing II

Picture Description¹⁾

A blurry, long-exposure shot of a cityscape across water, likely taken from a moving boat.

Analysis¹⁾

This panoramic photograph presents a blurred cityscape reflected in a body of water under a heavily overcast sky. The buildings, rendered in indistinct shapes and shades of grey, suggest a modern urban environment. The water's surface mirrors the sky and architectural forms, creating a dynamic interplay of light and shadow. The overall effect is one of motion and ambiguity, inviting viewers to contemplate the ephemeral nature of perception and the urban landscape.
