

# 003973

Empty Field I

## Picture Description<sup>1)</sup>

A field of harvested crops with remaining stubble and scattered debris.

## Analysis<sup>1)</sup>

This evocative black and white photograph captures a harvested field, likely after the grain or crop has been cut. The remaining stubble stands stark against the dark earth, creating a textured and patterned surface. The low angle perspective emphasizes the vastness of the field, while the monochrome palette lends a sense of desolation and the passing of time. The interplay of light and shadow adds depth and dimension to the photograph, highlighting the remnants of the harvest and the cycle of nature. The overall effect is both somber and beautiful, prompting reflection on the relationship between humans and the land.
