Fisheye Reflection

Picture Description¹⁾

A reflective sphere captures a distorted cityscape, blending exterior buildings with interior light fixtures.

Analysis¹⁾

This photograph presents a distorted urban landscape viewed through a reflective sphere. The buildings, trees, and street scene are compressed and inverted, creating a surreal, dreamlike quality. The sphere itself adds layers of complexity, with internal reflections and gradients enhancing the sense of depth and abstraction. The photograph captures a moment of everyday reality transformed into a compelling visual puzzle.
