Water XXXII

Picture Description¹⁾

A black and white photograph shows several ducks swimming in water that is rippled by the wind.

Analysis¹⁾

This black and white photograph captures a group of ducks swimming on a body of water. The water's surface is textured with numerous small waves, creating a complex pattern of light and shadow. The ducks, appearing as dark silhouettes, are scattered across the scene, each creating a small wake as they move. The high contrast emphasizes the starkness of the photograph, drawing attention to the interplay between the smooth, reflective water and the solid forms of the birds.
