Sky View II

## Picture Description<sup>1)</sup>

Abstract composition of crossing steel beams against a neutral sky.

## Analysis<sup>1)</sup>

This minimalist composition captures the intersection of two metal beams against a soft, overcast sky. The sharp lines and contrasting light and shadow create a sense of depth and geometric abstraction. The limited color palette, dominated by shades of gray and white, emphasizes the architectural form and clean lines of the structure. The composition's simplicity invites contemplation on the interplay of light, form, and space.
